Summary

Progress in the growth strategy is steady and results have exceeded the plan

FY 12/2023

1H Business Results

- Business condition has been favorable amid rising DX demand.
- As a result, performance further exceeded the revised earnings forecast.

Full-Year Earnings Forecast

- Business condition is expected to remain favorable in the 2H.
- The Company will continue to invest in development for expansion of cloud services.
- Full-year forecast was revised upward.

Medium-Term Management Plan (2022-28)

Performance Plan

- The performance is expected to exceed the original plan for 2 consecutive fiscal years.
- Accumulation of recurring revenue has been steadily increasing.

Measure 1 “Cloud Penetration”

- Cloud software is expected to be released in line with the plan.
- The number of users changing to cloud software will increase dramatically from FY2024.

Measure 2 “Service Expansion”

- Full-scale operation of cloud ordering platform will begin from 4Q of FY2023.

Consolidated Financial Results for the 2Q

The Company achieved double-digit growth in revenue. Especially, sales of “Cloud service” on which we focused have doubled. The loss was also smaller than forecasted and showed improvement compared to the same period of the previous fiscal year.

(Millions of Yen)	FY2023 1H	FY2022 1H	YoY Change	YoY Ratio	Forecast (May 10)	Vs. Forecast
Revenue	7,390	6,520	+869	+13.3%	7,100	+290
Cloud service	2,141	1,046	+1,096	+104.7%	2,100	+41
Packaged system	5,248	5,474	-226	-4.1%	5,000	+248
Cost of sales	2,985	2,459	+526	+21.4%	2,950	+35
Gross profit	4,405	4,061	+343	+8.5%	4,150	+255
SG&A expenses, etc.	5,516	5,460	+56	+1.0%	5,700	-184
Operating profit *	-1,111	-1,398	+287	-	-1,550	+439
Profit before tax *	-1,102	-1,458	+356	-	-1,600	+498
Profit attributable to owners of the parent*	-826	-1,109	+282	-	-1,400	+574
Basic earnings per share*	-9.33 yen	-12.57 yen	-	-	-15.80 yen	-

*Minus (-) represents loss

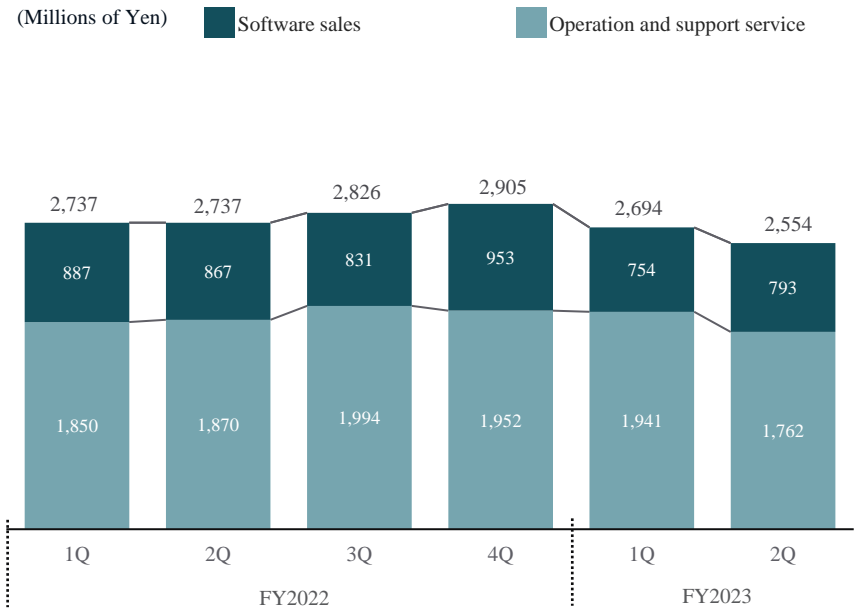

Quarterly Sales by Service Categories

The number of users of software services, which are on a monthly subscription, has continued to increase. Sales from “Operation and support services” have decreased as users of packaged software switch to monthly subscriptions.

Quarterly Sales of “Cloud Service”

Quarterly Sales of “Packaged System”

Explanation

Software service

- The deployment of cloud software to small-to-medium-sized auto maintenance and auto body shops is advancing steadily.
- Capturing of IT demand for DX investment and compliance to the Electronic Book Storage Act has increased.

Marketplace

- There has been no significant change in the number of service users and the frequency of use.

Explanation

Software sales

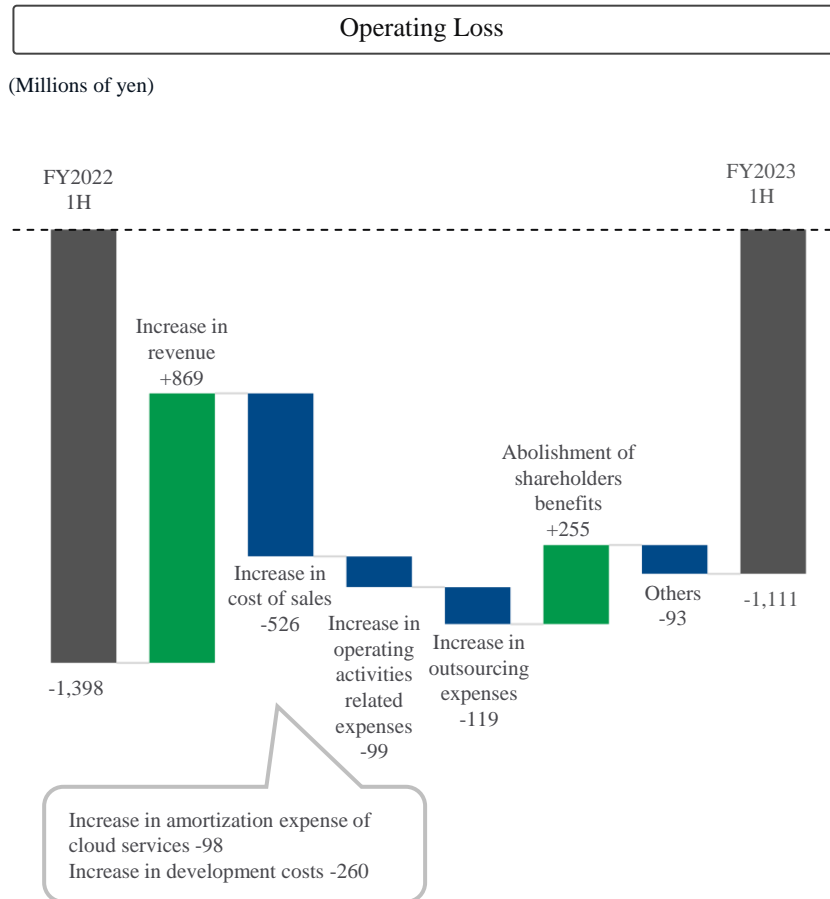

- Leasing sales of packaged software for the mobility sector have already finished.
- Demand for packaged software in the non-mobility sector has been strong due to recovery from COVID-19.

Operation and support service

- The number of users changing from packaged software to monthly subscriptions has been trending upward from the 2H of the previous fiscal year.

Factors behind Changes in Operating Loss

Higher sales absorbed upfront investment costs such as software development and strengthening the infrastructure for providing services.

Cost of Sales

- Increased due to upfront expenses to strengthen IT infrastructure in preparation for future service expansion.
- Increased due to increasing amortization expenses associated with the extension of cloud software functions, etc.

SG&A Expenses, etc.

- Expenses related to operating activities rose due to higher travel and social expenses associated with intensified sales activities and promotions.
- Outsourcing expenses increased due to the outsourcing of back-office business operations, etc.

Balance Sheet Status

Non-current assets increased due to capitalization of software development and office leasing fees.

Current liabilities increased due to the implementation of borrowings, as well as an increase in contract liabilities resulting from increasing number of long-term contracts for cloud software.

(Millions of Yen)	FY2023 End of 1H	FY2022 Year-End	YoY Change	Major Breakdown of Increase/Decrease
Current assets	6,690	6,555	+135	Operating and other receivables +104
Non-current assets	29,038	26,980	+2,058	Intangible assets +1,034 Property, plant and equipment +592
Total assets	35,728	33,535	+2,192	
Current liabilities	9,265	6,583	+2,683	Short-term interest-bearing debts +1,747 Contract liabilities +911
Non-current liabilities	3,373	3,291	+82	Long-term interest-bearing debts +79
Total liabilities	12,638	9,873	+2,765	
Total equity	23,090	23,662	-573	Loss -844 Dividends payout -88
Total liabilities and equity	35,728	33,535	+2,192	

Cash Flows Status

Operating cash flow is trending upward due to an increase in contract liabilities resulting from the increasing number of long-term contracts for cloud software.

(Millions of Yen)	FY2023 1H	FY2022 1H	YoY Change	Major Breakdown of Increase/Decrease
Cash flow from operating activities	1,126	460	+666	Increase in operating and other receivables -1,895 Increase in operating and other payables +905 Increase in contract liabilities +953
Cash flow from investment activities	-1,917	-1,424	-493	Increase in payments for acquisition of intangible assets -395
Cash flow from financing activities	717	649	+68	Decrease in cash dividends paid +325 Increase in short-term loans payable +179 Repayment of long-term loans payable -438
Free cash flow	-791	-964	+173	
Cash and cash equivalents at end of the period	3,386	3,212	+174	

Consolidated Earnings Forecast (Full-year)

The forecast was revised for both revenue and loss, taking into account the financial results for the first half of FY2023 and the current business environment.

(Millions of Yen)	FY2023 Full-Year Forecast	FY2022 Full-Year	YoY Change	YoY Ratio	Previous Forecast (May 10)	Vs. Forecast
Revenue	15,300	13,833	+1,467	+10.6%	15,000	+300
Cost of sales	6,100	5,346	+754	+14.1%	6,100	±0
Gross profit	9,200	8,487	+713	+8.4%	8,900	+300
SG&A expenses, etc.	11,400	11,384	+16	+0.1%	11,600	-200
Operating profit *	-2,200	-2,897	+697	-	-2,700	+500
Profit before tax *	-2,300	-3,005	+705	-	-2,800	+500
Profit attributable to owners of the parent *	-1,900	-2,431	+531	-	-2,400	+500
Basic earnings per share*	-21.42 yen	-27.54 yen	-	-	-27.07 yen	-

*Minus (-) represents loss

Full-Year Sales Forecast by Service Categories

Sales forecast for “Cloud service” remains unchanged since the number of users is expected to grow as planned.

Sales forecast for “Packaged system” was revised upward, taking into account business conditions in non-mobility sector.

(Millions of Yen)	FY2023 Full-Year Forecast	FY2022 Full-Year	YoY Change	YoY Ratio	Previous Forecast (Feb. 10)	Vs. Forecast
Cloud service	5,900	2,628	+3,272	+124.5%	5,900	±0
Software service	5,250	1,958	+3,292	+168.2%	5,250	±0
Marketplace	650	670	-20	-3.0%	650	±0
Packaged system	9,400	11,205	-1,805	-16.1%	9,100	+300
Software sales	2,500	3,539	-1,039	-29.3%	2,200	+300
Operation and support service	6,900	7,666	-766	-10.0%	6,900	±0
Total	15,300	13,833	+1,467	+10.6%	15,000	+300

Breakdown of Changes in Full-Year Operating Loss Forecast

Increase in revenue will absorb the cost of prior investment in preparation for further revenue growth and higher operating expenses.

Operating Loss

(Millions of yen)

FY2022 FY2023 Forecast

Increase in amortization expense of cloud services -118
 Increase in development costs -378

Cost of sales

- Amortization expenses of cloud services will increase in line with the launch of cloud services.
- Development costs will increase due to the development of new cloud services.

SG&A expenses, etc.

- In addition to the strengthening of recruitment activities, expenses related to share-based compensation are expected to increase.
- Expenses related to sales activities and strengthening of promotions are expected to increase.
- Various infrastructure expenses necessary for strengthening the operation of cloud services are expected to increase.
- As a result of the abolishment of the shareholder benefit program in FY2022, its related expenses in FY2023 are expected to decrease.

Dividend Forecast

Year-end dividend forecast for FY2023 remains unchanged from 1.00 yen per share.

Dividend per share

(Yen)	FY2023 (Forecast)	FY2022
Interim dividend	0.00 yen	0.00 yen
Year-end dividend	1.00 yen	1.00 yen
Annual dividend	1.00 yen	1.00 yen
Consolidated dividend payout ratio	-	-

Explanation

- Although financial results for FY12/2022 and FY12/2023 is planned to be a loss, the Company judged that it is possible to pay a dividend in consideration of retained earnings.
- Annual dividend forecast for FY2023 is 1.00 yen per share (interim dividend :0.00 yen, year-end dividend: 1.00 yen).

P24

Medium-Term Management Plan (2022-28): Growth Strategy

In order to evolve into a unique platformer in the mobility industry, we are advancing our growth strategies of “Cloud Penetration” and “Service Expansion.”

Positioning of Our Services

Medium-Term Management Plan (2022-28): Performance Plan

Financial results are expected to exceed the plan for 2 consecutive fiscal years.

Main factor for exceeding the plan

Recovery in demand of packaged software for non-mobility sector

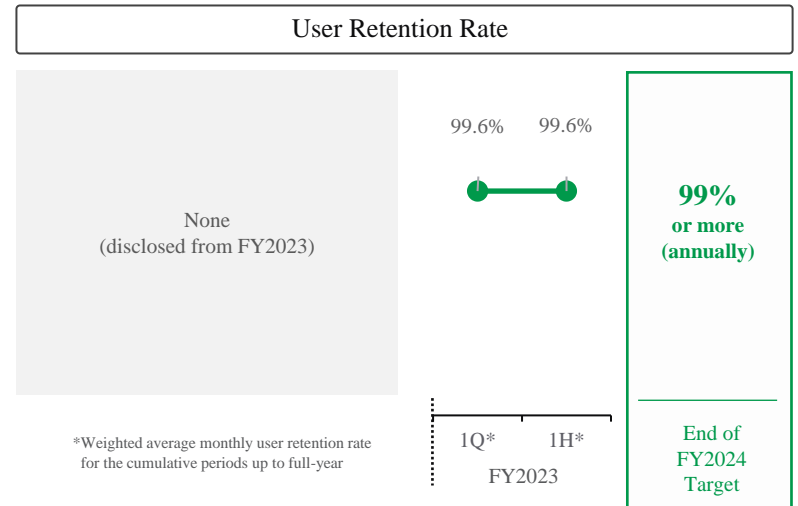

Main factor for exceeding the plan

Improving efficiency of operating activities and back-office business operations

*Announced on Aug.10

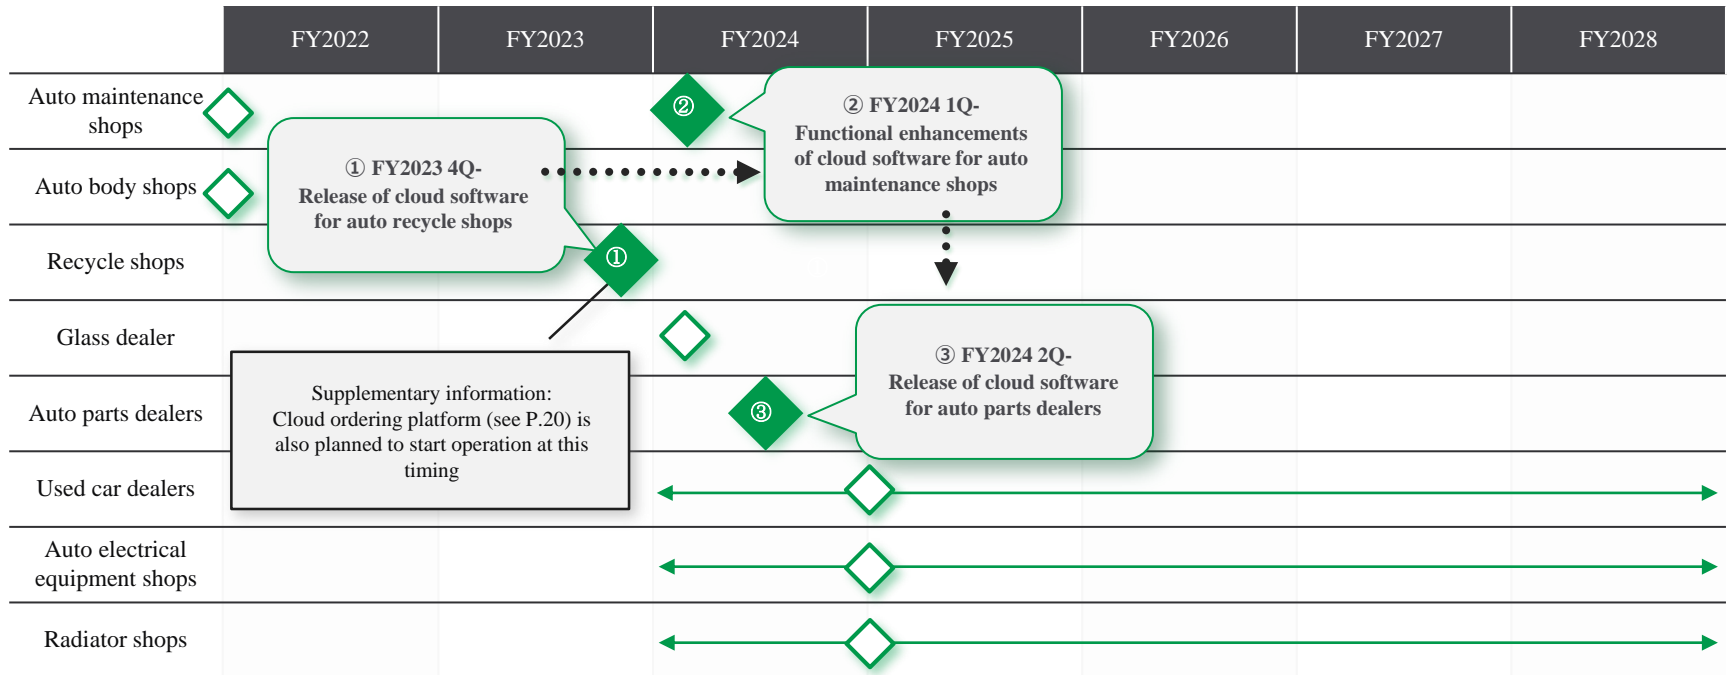

Cloud Penetration: Progress of Cloud Indicators

Considering the types and functions of currently released cloud software, the current level of indicators is as planned.

Cloud Penetration: Roadmap for Cloud Software Release and Functional Enhancements

There are three key approaches to accelerate the growth of cloud indicators to meet our end-of-FY2024 targets.

Supplementary information:
Cloud ordering platform (see P.20) is also planned to start operation at this timing

Reference: Indicators for packaged software (comparison by industry)		Auto parts dealers and auto recycle shops
Number of licenses per company (as of the end of 2022)	When compared with auto maintenance and auto body shops	About 2.5 times more
Average monthly amount sales (average of 2015-2020*)		About 1.1 times more
Number of companies (as of the end of 2022)	Auto maintenance and auto body shops: 29,182 companies	2,944 companies

*Since monthly contracts and multi-year lease contracts are mixed from 2021 onward, comparisons are made using figures prior to 2020

Cloud Penetration: DX Solutions

The number of licenses for DX solutions is generally on the rise.

DX Solutions

(license)

■ Dencho.DX ■ BL.Homepage (Premium edition) ■ Google Workspace™

Future Outlook

Solution compliant with the Electronic Book Storage Act (“Dencho.DX”)

Grace period will be abolished at the end of December 2023, so we anticipate a surge in last-minute demand.

Website creation tool (“BL.Homepage”)

With the tailwind of DX demand, we anticipate a gradual increase will continue in the future

Groupware (Google Workspace™)

Driven by DX demand and branding power, we anticipate continued growth in the future.

Service Expansion: Scalability of the Platform Service

The range of available services, including ordering platform, expands as items on either horizontal or vertical axis are implemented.

Specialized Service, etc. General-Purpose Service, etc.		In-house cloud software (for mobility sector)							In-house packaged software (for non-mobility sector)			In-house software	Other company's services

Medium-Term Management Plan (2022-28): Performance Plan

- The Company will achieve record-high performance in FY2026, with a target of operating margin of 40% and profit of 8 billion yen in FY2028.
- Performance in FY2022 exceeded the initial forecast, and performance in FY2023 is also expected to exceed the initial forecast for 1H FY2023.

(Billions of yen)	FY2022 Plan	FY2022 Result	FY2023 Plan	FY2023 Forecast (Aug. 10)	FY2024 Plan	FY2025 Plan	FY2026 Plan	FY2027 Plan	FY2028 Plan

Medium-Term Management Plan (2022-28): Sales Plan by Service Categories

- Within “Cloud services,” “Software service” is expected to drive the revenue growth.
- “Packaged system” is expected to shrink as conventional software are changed to cloud services.

(Billions of yen)	FY2022 Plan	FY2022 Result	FY2023 Plan	FY2023 Forecast (Aug. 10)	FY2024 Plan	FY2025 Plan	FY2026 Plan	FY2027 Plan	FY2028 Plan

Sales Trend of Cloud Service Expected in the Future

Sales plan of "Cloud service"

(Billions of yen)

*Announced on Aug.10

Medium-Term Management Plan (2022-28): Measures

- In order to penetrate the cloud services, the Company implements the following measures and manages the progress using the following KPIs.

1. Cloud transition

In 2022, the Company started transition to cloud-based software when existing clients' 6-year contracts for packaged software expires. The transition is scheduled to be completed in 2028.

Related KPI

- Cloud transition rate

2. Market expansion

Cloud software, which has evolved into a total management system, is deployed not only in existing markets but also in new markets such as car shop chains, car dealers that provide auto maintenance services, and service stations.

Related KPI

- Cloud software licenses
- User retention rate of cloud-based software

Related indicators

- Total number of users
- Retention rate of packaged software users
- The number of cloud software users

3. Menu expansion

In addition to the various optional services of cloud software, the Company provides various software services, including groupware, solutions that comply with law and regulation, and website creation tools.

Related KPI

- Average license monthly sales of cloud software

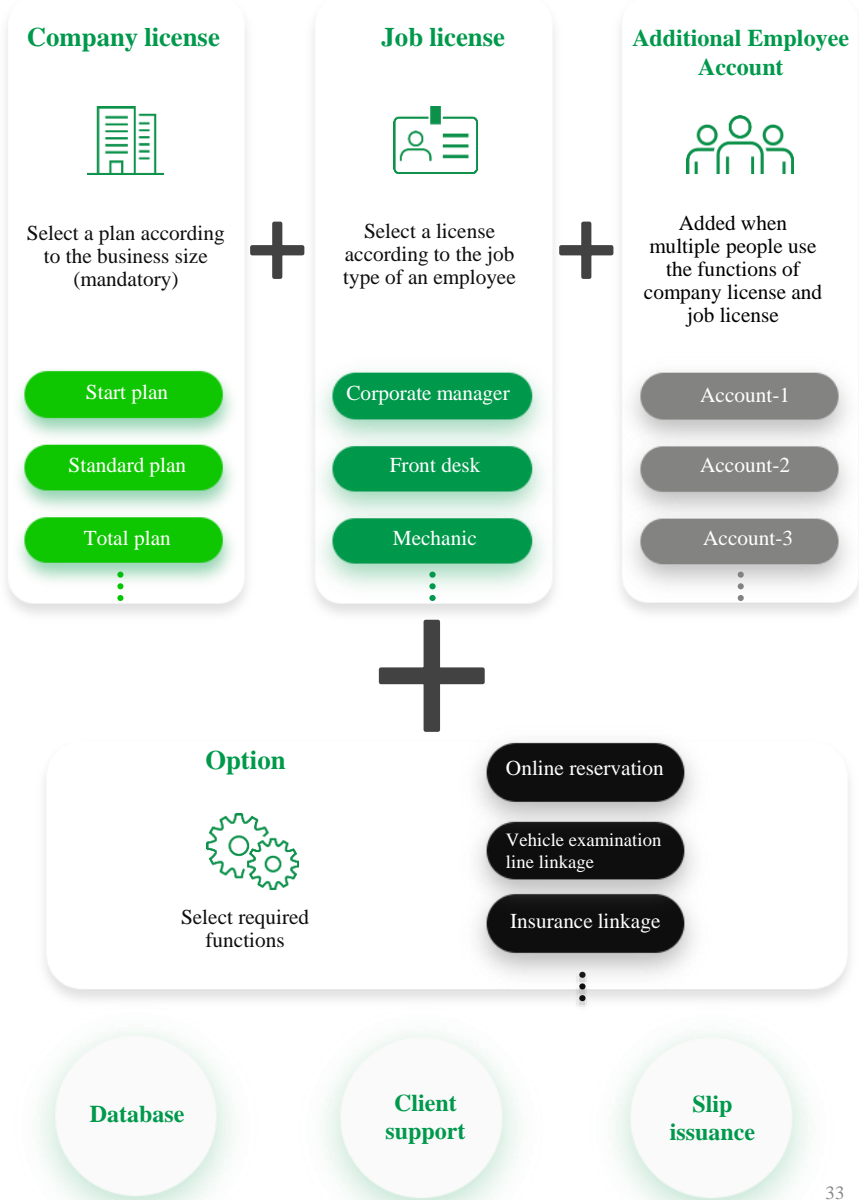

Related indicators

- Number of licenses for major software services

Service Structure (Cloud Software)

Select the required licenses and options according to the business size and contents

Clients will select a plan from the company license menu and select necessary job licenses in addition. When multiple people use the functions of company license and job license, purchase of additional employee account is necessary according to the number of users. There are also other service menus such as database and client support.

Understanding of Cloud Transition Rate

- Switching to cloud-based software will not proceed at a constant pace.
- Clients switch when 6-years contracts expire, so the number of switching users depends on the number of deals 6 years ago.

Understanding of cloud transition rate

Reference: Revenue from FY2016

(Millions of yen)

* Tajima Inc. became consolidated subsidiary of Broadleaf Group from 3Q FY2017.
 Note) cloud software for auto parts dealers and auto recycle shops have not yet been provided.

Understanding of Changes in Software Sales due to Cloud Transition (The Case of Auto Maintenance Shops and Auto Body Shops)

If the Company continues to sell packaged software in 2022 and beyond

About 1/6 of user companies renew their contracts each year, but there is a wave in the number of contract renewals depending on the year.

Sales of licenses (6-year usage rights)

Target of each year: Companies who renew the contract for packaged software (About 1/6)

Accounting method: License fee for 6 years is booked in lump-sum as sales in the year when the contract is renewed.

Sales of operation and support services

Target of each year: All users of packaged software

Accounting method: Monthly sales

If the Company starts selling cloud software (Green) from 2022

About 1/6 of companies using packaged software will switch to cloud software each year. Average sales are expected to rise after the transition completes due to different licensing systems

- For the year in which the contract is switched, the period after the contract is concluded will be booked as sales (). Therefore, sales from the following year onward () will be roughly doubled because sales for 12 months are fully booked
- Sales of operation and support services are received from users of packaged software, so it will gradually decline as the transition proceeds.

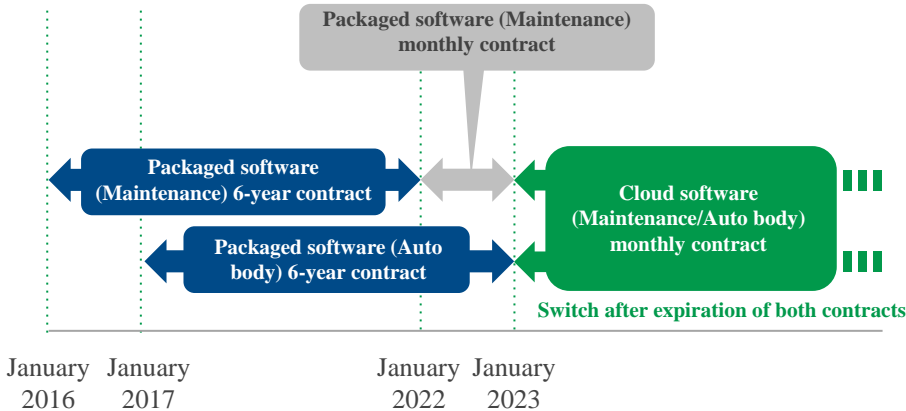

Cases for Providing a Monthly Contract of Packaged Software

- Some clients will keep using packaged software under monthly contracts for a limited period.

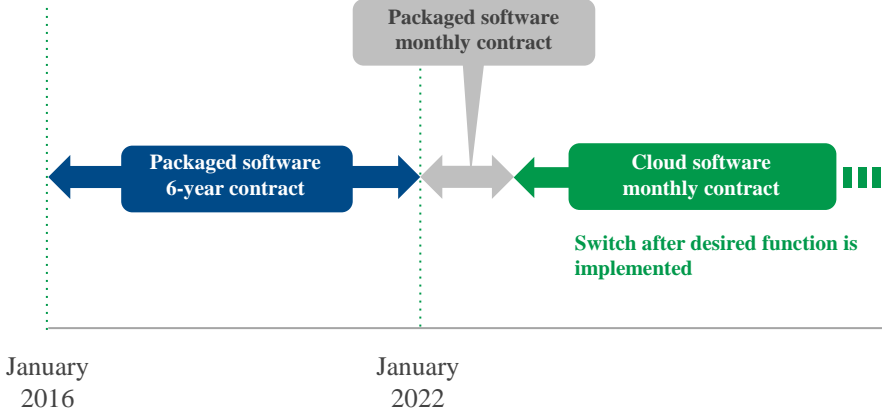

Case (1): Clients with multiple lease contracts

Example: Client with 6-year contract of packaged software for auto maintenance shop concluded in 2016 and 6-year contract for auto body shop concluded in 2017

Case (2): Clients who wish to use a specific function

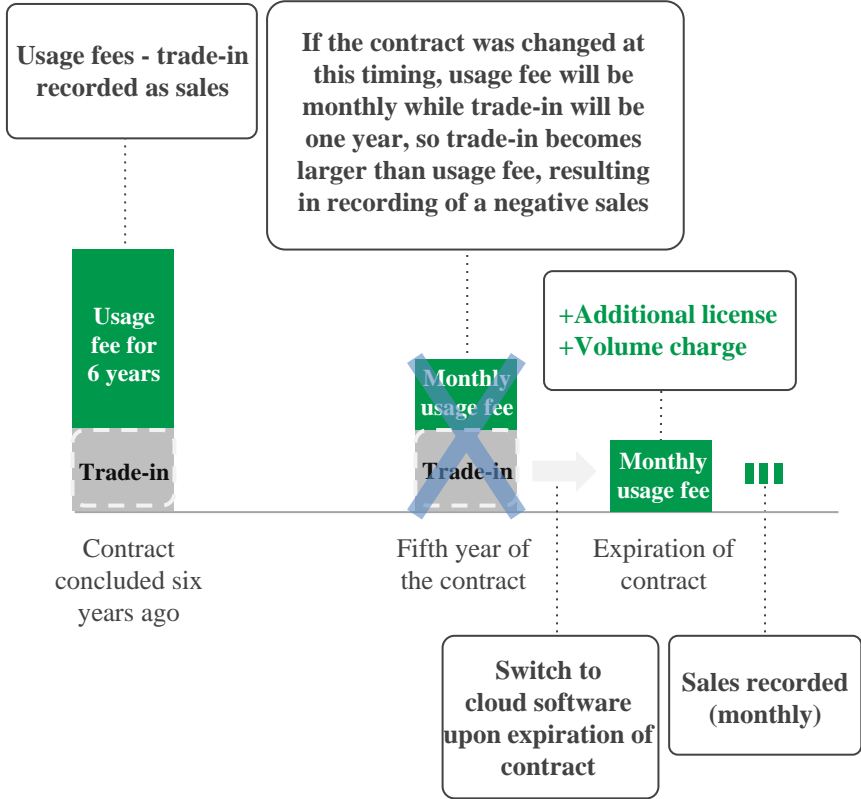

Example: Client whose contract of packaged software will expire in 2022, but the desired function is not implemented at the time.

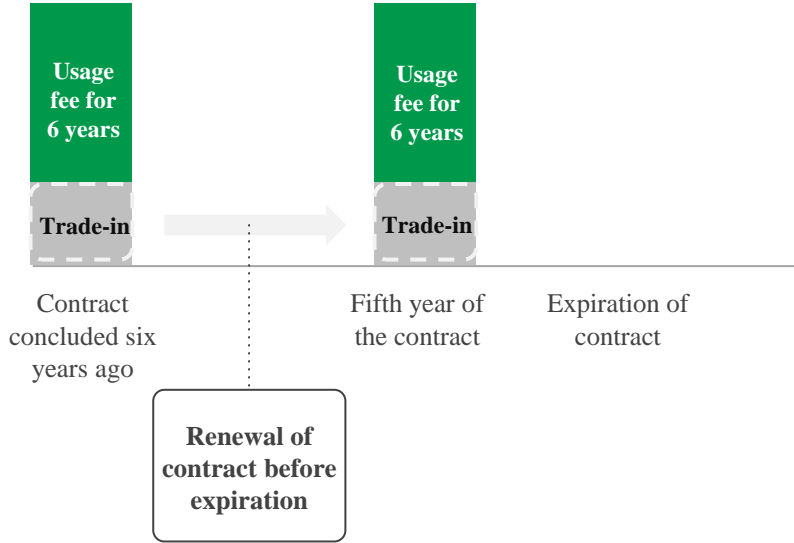

Reason for Switching to Cloud Software when the Previous Contract Expires

- If existing clients who have lease contracts of packaged software for 6 years switch to cloud-based software before the expiration of the contract, negative sales will be recorded.

In the case of cloud software*

In the case of packaged software with multi-year lease contract

*The same applies when selling packaged software under a monthly subscription contract

Explanation of Service Categories

Cloud service

Software service
